Parth Rajesh Chandurkar

Cloud & DevOps Enthusiast

+91-7057252266 parthrchn27@gmail.com GitHub LinkedIn Portfolio

Education

Vishwakarma Institute of Information Technology (VIIT), Pune **Aug 2023 – Present**
Bachelor of Technology in Information Technology *CGPA: 8.71 / 10*

Skills

Languages: Python, Java, SQL, Bash
Cloud & DevOps: AWS (EC2, S3, RDS, IAM, Lambda, CloudWatch), Docker, Kubernetes, Minikube, Helm, GitHub Actions, CI/CD, Terraform
Networking Fundamentals: Linux, TCP/IP, DNS, Security
Observability: Prometheus, Grafana, Loki, Alertmanager, OpenTelemetry, Jaeger
Backend & Databases: FastAPI, REST APIs, Redis, MySQL, PostgreSQL, MongoDB

Experience

ZenithMind **Oct 2025 – May 2026**
Capstone Research Project

- Deployed a React/Node.js mental health application on AWS EC2, packaging it with Docker and orchestrating containers through Kubernetes for access by the research cohort.
- Integrated Google Fit APIs with OAuth authentication to incorporate physical activity and sleep metrics into wellness analytics, supporting clinician review, appointment scheduling, and more informed treatment discussions.
- Co-authored the project's research paper, published in IEEE Xplore.

InfraWatch **June 2026 – Present**
Creator & Lead Engineer

- Developed a React-based dashboard and FastAPI backend for a Kubernetes-oriented deployment and observability platform, complemented by a Python CLI for local runtime management and diagnostics.
- Integrated Prometheus, Grafana, Loki, Alloy, Alertmanager, and Redis to support infrastructure monitoring, log analysis, alerting, and metrics retrieval across a containerized environment.
- Expanding InfraWatch toward unified project and deployment management through a shared web app and CLI, with planned GitHub repository analysis, deployment tracking, and consolidated operational reports.

Hewlett Packard Enterprise (HPE) **Sep 2026 – Present**
Software Engineering — Forage Virtual Experience

- Designed a RESTful service proposal for employee data management using Java Spring Boot and HPE GreenLake, defining the API structure and cloud-platform integration.
- Implemented a Spring Boot REST API supporting JSON data uploads and wrote unit tests to verify endpoint behavior and expected responses.

Projects

Predictive Network Degradation & Route Optimizer GitHub

- Engineered a Python/NetworkX routing system that identifies LTE degradation patterns from real telemetry and favors healthier routes over shortest-distance paths, with leakage-aware Random Forest evaluation and Dijkstra, Bellman-Ford, and Floyd-Warshall algorithms.
- Achieved 0.832 F1 and 0.954 ROC-AUC on held-out cells; controlled Mininet tests improved throughput from 0.333 to 1.168 Mbps (+251%) and reduced average RTT from 278 to 93 ms (-66.6%). Added a Streamlit network-operations dashboard with OpenTelemetry instrumentation, Jaeger trace inspection, and Prometheus metrics collection.

Pharmenia – Pharmacy Management System GitHub

- Developed a Python/Tkinter pharmacy application with MySQL on AWS RDS, an EC2-hosted backend, and S3-based document storage, supporting medicine inventory management, supplier coordination, and FIFO-based invoice generation.

Achievements

- **IEEE Publication** – Co-authored and published a research paper on the ZenithMind project in IEEE Xplore.
- **100% in SSC (Maharashtra State Board)** – Achieved a perfect score in the Class 10 examination.

Certifications

- **IBM DevOps and Software Engineering Professional Certificate** – Coursera View
- **AWS Cloud Practitioner Specialization** – Udemy View
- **CCNA v7: Introduction to Networks** – Cisco Networking Academy View
