

PARTH RAJESH CHANDURKAR

Cloud & DevOps Engineer

☎ +91-7057252266 ✉ parthrchn27@gmail.com 🌐 github.com/ParthrChandurkar 🔗 linkedin.com/in/parth-chandurkar 🌐 [Portfolio](#)

Summary

Final-year Information Technology student specializing in Cloud and DevOps, with hands-on experience in AWS, Terraform, Docker, Kubernetes, GitHub Actions, Linux, and observability. Built and deployed containerized workloads with infrastructure automation, CI/CD, cloud monitoring, and Redis-based caching.

Skills

Languages: Python, Java, SQL, Bash

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, IAM, CloudWatch), Docker, Kubernetes, Helm, Git, GitHub Actions, Jenkins, CI/CD

Networking & IaC: Linux Administration, Terraform, K8s, TCP/IP, DNS, Security Fundamentals

Observability & Monitoring: Prometheus, Grafana, Alertmanager, Splunk

Frameworks & Databases: Spring Boot, FastAPI, REST APIs, Redis, MySQL, PostgreSQL

Currently Learning: RHEL, OpenShift

Education

Vishwakarma Institute of Information Technology (VIIT), Pune

Bachelor of Technology in Information Technology

Aug 2023 – Present

CGPA: 8.71 / 10

Experience

ZenithMind – AI-Powered Mental Health Assistant

Oct 2025 – May 2026

Capstone Research Project | [IEEE Published Paper](#)

- Collaborated with a team to deploy a React/Node.js application on AWS EC2 using Docker and Kubernetes for containerization and orchestration, making the platform available across the research cohort.
- Configured Kubernetes Horizontal Pod Autoscaler and AWS CloudWatch alarms for workload scaling and monitoring, improving application reliability and operational visibility throughout the project lifecycle.

Projects

InfraWatch – Open-Source Local K8s Deployment & Observability Platform

[GitHub](#)

- Developed a local Kubernetes deployment and observability platform with a React dashboard for pod health, rollout status, live logs, and application metrics, enabling developers to validate cloud-native workloads on Minikube before cloud deployment.
- Provisioned infrastructure with Terraform and Helm, automated container image builds and Kubernetes manifest deployment through GitHub Actions, and used Redis to cache recent Prometheus query results for repeated dashboard requests.

OrbisFlow – AI-Assisted Invoice Approval Workflow Platform

[GitHub](#)

- Deployed a multi-role invoice approval workflow on AWS using Java Spring Boot and FastAPI microservices with Docker containerization, integrating Tesseract OCR to extract invoice fields from documents stored in Amazon S3.
- Implemented role-based access control across Employee, Manager, and Finance workflows with JWT authentication, subject-bound CSRF protection, and an append-only audit trail using optimistic locking for concurrent approvals.

F1 Race Prediction and Strategy System

[GitHub](#)

- Built an ML/MLOps pipeline on AWS EC2 for race-position prediction from historical F1 telemetry, using Docker for reproducible training and inference workloads, Kubernetes for batch execution, and DVC for dataset versioning.
- Automated model retraining through GitHub Actions on dataset updates and stored pipeline outputs in Amazon S3, replacing a manual retraining workflow with a reproducible, version-controlled process.

Achievements

- **IEEE Publication** – Co-authored and published a research paper on the ZenithMind project in IEEE Xplore.
- **100% in SSC (Maharashtra State Board)** – Achieved a perfect score in the Class 10 examination.
- **97.97 Percentile in MHT-CET** – Achieved 97.97 percentile in the Maharashtra Common Entrance Test.

Certifications

- **IBM DevOps and Software Engineering Professional Certificate** – Coursera
- **AWS Cloud Practitioner Specialization** – Udemy
- **CCNA v7: Introduction to Networks** – Cisco Networking Academy
