

# PARTH RAJESH CHANDURKAR

## Cloud & DevOps Engineer

☎ +91-7057252266 ✉ [parthrchn27@gmail.com](mailto:parthrchn27@gmail.com) 🌐 [github.com/ParthrChandurkar](https://github.com/ParthrChandurkar) 🔗 [linkedin.com/in/parth-chandurkar](https://linkedin.com/in/parth-chandurkar)

### Summary

Determinant Cloud & DevOps Engineer with hands-on experience in AWS, Docker, Kubernetes, and CI/CD pipeline automation. Backed by industry-recognized certifications, seeking to architect reliable and scalable cloud-native infrastructure.

### Skills

**Languages:** C, C++, Python, Java, SQL, Bash/Shell Scripting

**Cloud & DevOps:** AWS (EC2, S3, RDS, Lambda, IAM, DynamoDB, Athena, CloudWatch), Git, GitHub, Docker, Kubernetes, Jenkins, CI/CD Pipelines, Terraform, Ansible, Linux

**Other:** MongoDB, Node.js, REST APIs

### Education

**Vishwakarma Institute of Information Technology (VIIT), Pune**

**Aug 2023 – Present**

*Bachelor of Technology in Information Technology*

*CGPA: 8.71 / 10*

– Relevant Coursework: Cloud Computing, Database Management Systems, Computer Networks, Operating Systems, Internet of Things (IoT), Machine Learning, System Design, Risk Analysis and Management.

### Experience

**F1 Race Prediction and Strategy System** [🌐 Github]

**Jan 2025 – Mar 2025**

*Freelance Project*

*MLOps — Docker — CI/CD — Machine Learning*

- Built an end-to-end ML pipeline to predict Formula 1 race outcomes and pit-stop strategies using historical race telemetry and driver performance data; achieved approximately 78% classification accuracy on race position prediction.
- Implemented a full MLOps workflow using DVC for data versioning and experiment tracking, Docker for reproducible model environments, and GitHub Actions for automated CI/CD model retraining and deployment.
- Designed a strategy simulation module that evaluated tyre degradation models and pit-window optimization, reducing predicted lap-time loss by approximately 12% compared to baseline strategies.

**ZenithMind- AI Powered Mental Health Assistant** [🌐 Github]

**Nov 2024 – Feb 2025**

*Capstone Research Project | [IEEE Research Paper](#)*

*React JS — AWS EC2 — NLP — Google Fit API*

- Designed and developed a CBT-based mental wellness platform featuring an AI chatbot with sentiment analysis and guided therapy flows, including virtual therapist escalation logic; implemented NLP-driven conversational pipelines resulting in approximately 33% increase in user engagement during stress episodes.
- Built scalable MERN architecture with cloud-hosted APIs on AWS EC2; integrated mood, stress, and behavioral analytics dashboards resulting in approximately 25% improvement in user self-awareness and progress tracking accuracy.
- Implemented secure authentication and real-time data visualization for daily emotional check-ins, resulting in approximately 35% improvement in user retention and check-in consistency.

### Projects

**Pharmacy Management System** [🌐 Github]

**2025**

*Python | Tkinter | AWS RDS | MySQL | REST APIs*

- Designed and built a cloud-ready pharmacy management system handling multi-store medicine inventory, expiry tracking, and vendor coordination; implemented a MySQL database hosted on AWS RDS with procedural SQL and REST API-oriented access.
- Implemented role-based access control (RBAC) for pharmacy admins and vendors, resulting in accurate stock visibility, reduced manual errors, and secure scalable operations across multiple concurrent users.

### Certifications

- **IBM DevOps and Software Engineering Professional Certificate** – Coursera
- **CCNA v7: Introduction to Networks** – Cisco Networking Academy
- **AWS Certified Cloud Practitioner Specialization** – Udemy
- **Career Essentials in Project Management** – Microsoft and LinkedIn Learning
