Summary

Cloud & DevOps Engineer with proven experience designing AWS-hosted infrastructure, containerizing workloads with Docker and Kubernetes, automating CI/CD pipelines, and building AI-powered workflow automations using n8n, Zapier, and Make. IEEE-published researcher and AWS-certified professional, seeking to build production-grade, cloud-native systems and intelligent automation solutions at scale.

Skills

Languages: C, C++, Python, Java, SQL, Bash/Shell Scripting

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, IAM, DynamoDB, Athena, CloudWatch), Docker, Kubernetes (K8s), Jenkins, CI/CD Pipelines, Terraform, Ansible, Git, GitHub, Linux

AI & Automation: n8n, Zapier, Make (Integromat), Workflow Automation, REST API Integration, Webhook Automation, AI Chatbot Development, NLP, Machine Learning, MLOps

Web & Databases: React, Node.js, Flask, REST APIs, MongoDB, MySQL, PostgreSQL

Experience

F1 Race Prediction and Strategy System

Jan 2025 – Mar 2025

Machine Learning Engineer – Freelance Project

MLOps | Docker | Kubernetes | CI/CD | AWS EC2

- Designed and launched an end-to-end ML pipeline on AWS EC2 to replace unreliable manual race strategy analysis; containerized training and inference workloads using Docker and orchestrated batch jobs via Kubernetes, achieving approximately 78% classification accuracy on race position prediction across 5 seasons of telemetry data.
- Implemented a full MLOps workflow using DVC for data versioning, Docker for reproducible environments, and GitHub Actions for automated CI/CD model retraining on every data push, reducing pipeline re-execution time by nearly 40% compared to the previous manual process.
- Engineered a pit-window strategy simulation module integrating tyre degradation models; published outputs to an AWS S3-hosted reporting layer, reducing predicted lap-time loss by 12% against baseline strategies.

ZenithMind – AI-Powered Mental Health Assistant

Nov 2024 – Feb 2025

Capstone Research Project | [IEEE Published Paper](#)

React JS | AWS EC2 | Kubernetes | NLP | Node.js

- Architected and delivered a CBT-based mental wellness platform with an NLP-driven AI chatbot, sentiment analysis, and virtual therapist escalation logic, shipped as microservices on AWS EC2 and load-balanced via Kubernetes HPA; achieved around 33% increase in user engagement during recorded stress episodes.
- Configured Kubernetes Horizontal Pod Autoscaler and AWS CloudWatch alarms to handle traffic spikes without over-provisioning; maintained 99.5% uptime throughout the research period while reducing idle compute costs by almost 20%, with JWT-based auth and real-time dashboards improving user retention by approximately 35%.

Projects

InfraWatch – Zero-Touch Deployments with Full Infrastructure Visibility

2025

FastAPI | React | Docker | Kubernetes | Terraform | Prometheus | Grafana | GitHub Actions

- Built a production-grade cloud-native platform where teams push code to GitHub and GitHub Actions automatically builds Docker images, pushes to DockerHub, and applies Kubernetes manifests – eliminating all manual release steps and cutting cycle time by around 60%.
- Provisioned the full observability stack (Prometheus, Grafana, Alertmanager, Loki, Promtail) via Terraform and Helm on a Minikube cluster; configured Kubernetes HPA with CPU-based auto-scaling, pod crash-loop alerts, and a React dashboard for live CPU, memory, request-rate, and log streaming across all deployed services.

Pharmacy Management System

2025

Python | Tkinter | AWS RDS | MySQL | Docker | REST APIs

- Replaced error-prone manual multi-store inventory tracking by building a cloud-ready pharmacy management system with a Tkinter desktop client backed by MySQL on AWS RDS; containerized with Docker for consistent cross-store deployment, implementing RBAC for admins and vendors and reducing manual entry errors by 30%.

Education

Vishwakarma Institute of Information Technology (VIIT), Pune

Aug 2023 – Present

Bachelor of Technology in Information Technology

CGPA: 8.71 / 10

- Relevant Coursework: Cloud Computing, Database Management Systems, Computer Networks, Operating Systems, Internet of Things (IoT), Machine Learning, System Design, Risk Analysis and Management.

Certifications

- IBM DevOps and Software Engineering Professional Certificate – Coursera
- CCNA v7: Introduction to Networks – Cisco Networking Academy
- AWS Certified Cloud Practitioner Specialization – Udemy
- Career Essentials in Project Management – Microsoft and LinkedIn Learning
